EXPLANATION

This request is **sole source**, because the Contractor is the only vendor authorized by the manufacturer to provide service, repairs, software updates, and replacement parts for the Extrahera instruments. The Contractor is also the sole provider with manufacturer-authorized, factory-trained service personnel. No alternative vendor can provide these services without voiding equipment warranties or compromising instrument performance.

The purpose of this request is to obtain preventive maintenance, repair services, and user support for three (3) Extrahera instruments used by the New Hampshire Public Health Laboratories (PHL). The Extrahera instruments provide the PHL with the capability to rapidly analyze large volumes of samples during chemical exposure emergencies, including events involving chemical terrorism agents such as nerve agents and other highly toxic compounds. Timely detection and reporting of exposure levels is essential to prevent serious health consequences, including death, and to enable health care providers to make accurate and timely treatment decisions. Chemical threat response protocols require analytical results to be reported within twenty-four (24) to forty-eight (48) hours. To meet these requirements, the Extrahera instruments must remain fully operational and properly maintained at all times.

The Department will actively monitor instrument performance, response times, and maintenance outcomes to ensure alignment with emergency response requirements. Manufacturer-authorized software and firmware updates will be performed regularly to maintain system reliability and data integrity.

As referenced in Exhibit A, Revisions to Standard Provisions of the attached agreement, the agreement may be extended for up to three (3) additional years, contingent upon satisfactory performance, availability of funding, mutual agreement of the parties, and Governor and Council approval.

If the Governor and Council do not approve this request, the PHL may not have the capability to conduct emergency response activities during chemical exposure events potentially endangering response times and the health and safety of New Hampshire residents.

A participant may decide the method and frequency by which it determines the eligibility of its principals.
