## REQUESTED ACTION

Authorize the Department of Administrative Services to extend an existing contract (Contract #8003207) with Cellco Partnership d/b/a Verizon Wireless (VC# 177660), Basking Ridge, NJ, for wireless cellular data services, by extending the completion date from March 31, 2026, to March 31, 2028, and increase the price limitation by \$3,646,014.44 from \$3,976,760.72 to an amount up to and not to exceed \$7,622,775.16, effective upon Governor and Executive Council approval. The original contract (Contract #8003207) was approved by Governor and Executive Council on May 3, 2023, item #160.

Funding shall be provided through individual agency expenditures, none of which shall be permitted unless there are sufficient appropriated funds to cover the expenditure.

## EXPLANATION

The original contract was approved by the Governor and Executive Council on May 3, 2023, item #160. That contract allowed for two one-year extensions. The Department is seeking to secure better pricing further into the future by utilizing both extensions in this amendment.

As the original contract neared completion, the Department of Administrative Services, evaluated service offerings and market pricing based on the active wireless cellular contracts through the National Association of Procurement Officials (NASPO). We found better pricing and superior coverage with our existing contracts with Verizon and T-Mobile. The department negotiated two-year extensions with both incumbent contractors with pricing at or below the current contracted rates. This contract will continue to provide agencies with access to wireless services throughout the state ranging from voice-only plans to voice/text/data/smartphone, and mobile hot spot capabilities.

Both T-Mobile (Contract 8003208) and Verizon (Contract #8003207) have held fixed rates on all active plans as well as offered reduced rates and expanded plan offerings to best align with agencies' needs. Most of the spend under this contract comes from a flat monthly fee per line. Because the plan has reductions in the flat monthly fee, we anticipate a migration to this plan from more expensive ones. Therefore, though the unit cost is

smaller, the spend for this particular contract will go up. As an example of the unit price savings, the most commonly used plan has 2,485 enrolled users. That plan is reduced by \$16.96 per month. Therefore, the cost savings for those 2,485 plans will be \$1,011,494.40 over the 2-year extension.

The following table represents a summary of the amount necessary to accommodate the requested two-year extension based on current contract trends. Detailed financial tracking is attached for reference.

Contract Financials	
Current price limitation	\$3,976,760.72
Add this amendment	\$3,646,014.44
New Price limitation	\$7,622,775.16

The Department of Administrative Services has determined that the vendor is in good standing with the Secretary of State's Office, has secured the required levels of insurance, and has provided evidence of authority to execute and be bound by the contract. The Department of Administrative Services also requested and received approval from the Commissioner of Department of Information Technology, 2023-044A. Documents supporting these assertions are available at the agency, for review upon request.

Based on the foregoing, I am respectfully recommending approval of this contract amendment with Cellco Partnership d/b/a Verizon Wireless.

Respectfully submitted,

Charles M. Arlinghaus  
Commissioner

Usage outside of the United States will be billed at the international travel feature rate, if applicable, or pay as you go pricing, which can be found at [www.verizonwireless.com/international](http://www.verizonwireless.com/international). Lines activating on this plan must be on 5G UWB-compatible, 5G Nationwide, or 4G LTE smartphones.

<sup>1</sup>After 22 GB of data usage on a line during any billing cycle, usage may be prioritized behind other customers in the event of 4G LTE and 5G Nationwide network service area congestion.

If the 4G LTE and 5G Nationwide Mobile Hotspot domestic data usage exceeds 10 GB on any line in any given billing cycle, Verizon Wireless will limit the data throughput speeds to up to 600 Kbps for additional domestic mobile hotspot usage for the remainder of the then-current billing cycle for the line that exceeds the data usage.

<sup>4</sup>Includes domestic toll-free calling and toll-free calling from the United States to Canada and Mexico.

Verizon Wireless will terminate a line if more than half of the usage over three consecutive billing cycles is outside of the United States, following 30 days' notice to Customer. For eligible countries, non-TravelPass country rates, and additional information, go to [www.verizonwireless.com/international](http://www.verizonwireless.com/international).

**Notes:** Current coverage details and additional plan information can be found at [www.verizonwireless.com](http://www.verizonwireless.com). Coverage includes the Verizon Wireless 5G Ultra Wideband (UWB) network, 5G Nationwide® network, and 4G LTE network. For avoidance of doubt, the Verizon Wireless 5G Nationwide network is a separate network from the Verizon Wireless 5G UWB network. Lines activating on these plans must be on 5G UWB-compatible, 5G Nationwide; or 4G LTE mobile broadband devices.

<sup>1</sup>A 5G device is required to receive 5G UWB service.

<sup>2</sup>Devices activated on these plans cannot be used outside of the United States.

**Data Sharing:** Lines on the same billing account on custom share plans with the same data overage rate can share data. At the end of each billing cycle, any unused data allowances will be applied to the overages of other lines, beginning with the line with the lowest overage.

These plans include Domestic Mobile Broadband Priority and Domestic Preemption. Mobile Broadband Priority provides a dedicated pool of radio resources to enable Customer connection to the network based on access hierarchy settings on the 4G LTE and 5G Nationwide network. Mobile Broadband Priority identifies the user with an access priority setting which provides that user with network access ahead of users with a lower access setting. Preemption automatically activates to provide approved personnel uninterrupted access to the network in those uncommon times when the network is fully utilized. 911 calls are never preempted.

**\* A brief service outage and device reboot may be required in order for the new plan to take effect. Verizon Wireless may proactively contact Customers to facilitate a plan migration.**

**These plans are available to Select NAICS (formerly SIC) Codes in the following industries at the discretion of Verizon Wireless.**
