EXPLANATION

This Request is sole source because Assa Abloy is the original equipment manufacturer (OEM) and sole factory-certified provider authorized to perform maintenance, inspections, repairs, and warranty-compliant service on the Megadoor systems installed at these facilities. The Megadoor systems are highly specialized aircraft hangar door systems containing proprietary mechanical, electrical, and safety components that require OEM-certified technical knowledge, specialized training, and manufacturer-approved parts and procedures.

Her Excellency, Governor Kelly A. Ayotte
And the Honorable Executive Council
May 12, 2026
Page 2 of 2

The scope of work includes factory-certified preventative maintenance and inspection services on ten Megadoor systems supporting both Army and Air National Guard aviation operations. The preventative maintenance includes detailed inspection, testing, adjustment, and servicing of critical components including lifting assemblies, wire rope systems, motors, electrical controls, safety arresters, limit switches, and structural systems. The maintenance checklist contains over one hundred inspection and operational verification points specific to the proprietary Megadoor design.

These services are necessary to ensure the continued safe and reliable operation of the aircraft hangar door systems, reduce the risk of unexpected equipment failures, extend operational life, and maintain compliance with manufacturer safety standards.

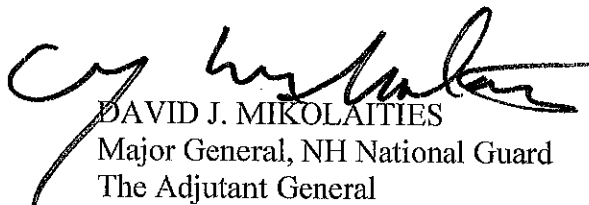

This contract also includes a contingency line for the purpose of the Department of Military Affairs and Veterans Services to request repairs that fall outside of the scope of the Megadoor Preventative Maintenance as specified in Exhibit B (Scope of Services) of this agreement.

Funds to support this service are provided by the Federal Government and are administered under an existing Federal-State Agreement. Under the Agreement, the State of New Hampshire - Department of Military Affairs and Veterans Services provides these services and the Federal Government reimburses the State for the costs related to the services at the rate of 100% (2245) and 75% (2233). In the event that Federal Funds are not available for this contract, General Funds will not be used.

If funding for this contract is not approved by the Governor and Executive Council, our Megadoor systems could fail, resulting in restricted aircraft movement, disrupted maintenance and flight operations, delayed mission response capabilities, and significant safety and operational risks to personnel and State and Federal equipment.

This contract has been approved for form, substance, and execution by the New Hampshire Department of Justice.

Respectfully submitted,

DAVID J. MIKOLAITIES
Major General, NH National Guard
The Adjutant General

To whom it may concern:

ASSA ABLOY Entrance Systems specializes in engineering and manufacturing the Megadoor hangar door system to the exact specifications and design for Military and Civilian Aviation applications for crucial missions and business opportunities alike.

ASSA ABLOY Entrance Systems is the only Manufacturer of the Megadoor hangar door in the United States. Furthermore we are the only certified Megadoor Company that can provide the OEM proprietary repairs and or modifications to your Megadoor hangar door systems. We strongly recommend that you use certified representatives due to the complexity, size, and liability involved in maintaining and in some instances modifying your door system. As a rule Megadoor requires complete certification of all our technicians whom receive years of training at our manufacturing facility in Peachtree City Georgia as well as on the job. This training provides them the mechanical and electrical training required to insure proper operation and reliability for your mission critical door systems.

Modifications to safety devices and controls not performed by Megadoor Certified technicians and organizations with little to no knowledge of these specialty designed systems has the potential to severely damage the door system and in the worst of cases put equipment and personnel at risk.

In the event that Maintenance, repairs or upgrades are made by a Non Megadoor certified technician which have any subsequent problems, either direct or indirect, will be the responsibility of the person who performed such tasks and void any and all Assa Abloy Warranties.

Please, do not hesitate to contact me, if you have any questions or require any additional information.

Regards,

Zach Kearney
Director of Global Service Sales
