REQUESTED ACTION

Authorize the Department of Administrative Services (DAS) to enter into a amendment to an existing **Sole Source** contract (Contract #8003310) with Environmental Systems Research Institute, Inc (VC#176214), Redlands, CA, for geographic information systems software and training services by increasing the price limitation by \$2,385,869.17 from \$2,114,130.83 to an amount up to and not to exceed \$4,500,000.00 with no change to the contract completion date, effective upon Governor and Executive Council approval through October 31, 2028. The original contract was approved by the Governor and Executive Council on May 29, 2024, item #136.

Funding shall be provided through individual agency expenditures, none of which shall be permitted unless there are sufficient appropriated funds to cover the expenditure.

EXPLANATION

The original contract was executed on a **Sole Source** basis because no other vendor can supply the proprietary ArcGIS geographical mapping software solutions. ArcGIS Enterprise is the Environmental Systems Research Institute's foundational software that provides a powerful platform for running data visualization, analytics, and management. This software is essential for managing geographic data across most New Hampshire agencies. For example, the Department of Transportation relies on it for roadway mapping, and the Department of Environmental Services uses it to monitor state environments. Additionally, the Department of Natural and Cultural Resources utilizes it for mapping trails and protected lands, while the Department of Business and Economic Affairs applies it to federal programs with local municipalities.

The Department of Administrative Services monitors contract expenditures bi-monthly. A recent review revealed that state agencies have expended approximately 95 percent of the authorized contract limitation. More than two years remain in the original contract term. All active spending on this contract has been halted and cannot resume until this amendment receives approval from the Governor and Executive Council.

The department projects current spending trends to continue based on the ongoing agency needs for software, training, and implementation services. The annual spend requires an additional \$2,135,869.17 over the remaining term. An allowance of \$250,000.00 is also included to accommodate future unanticipated agency projects. The Commissioner of the Department of Information Technology supports this increase.

The financial breakdown is as follows:

Current spend limitation: \$2,114,130.83

Add this amendment: \$2,385,869.17

New spend limitation: \$4,500,000.00

Based on the foregoing, I am respectfully recommending approval of this **Sole Source** contract amendment with Environmental Systems Research Institute, Inc.

Respectfully submitted,

Charles M. Arlinghaus
Commissioner

Dear Commissioner Arlinghaus:

This letter represents formal notification that the Department of Information Technology (DoIT) has approved your agency's request to enter into a contract amendment with Environmental Systems Research Institute, Inc. (ESRI), as described below and referenced as DoIT No. 2024-120A.

The purpose of this request is for geographic information systems software and training services.

The Total Price Limitation shall increase by \$2,385,869.17 for a New Total Price Limitation of \$4,500,000.00, effective upon Governor and Executive Council approval with no change to the original contract end date of October 31, 2028.

A copy of this letter should accompany the Department of Administrative Services' submission to the Governor and Executive Council for approval.

Sincerely,

Corrine Tatro
Department of Administrative Services
Division of Procurement & Support Services
25 Capitol Street
Concord, NH 03301

Dear Ms. Tatro:

The Department of Business and Economic Affairs (BEA) supports the Division of Procurement & Support Services' request to amend the existing sole-source contract with ESRI to increase funding for the Geographic Information System (GIS) software and related services utilized by the State of New Hampshire.

The services provided under this agreement remain essential to the State's ongoing operations. ESRI software and support enable the maintenance, enhancement, and management of critical GIS datasets; provide technical assistance to municipalities and regional partners; and support numerous federally and state-funded initiatives. These services are integral to maintaining accurate statewide data infrastructure, meeting statutory and reporting requirements, and advancing key policy and investment priorities.

GIS serves as foundational infrastructure across state government. Agencies rely on accurate and current spatial data to carry out statutory and operational responsibilities including land use planning, housing and demographic analysis, environmental review, infrastructure investment, hazard mitigation, broadband deployment, and economic development planning. Many of these functions are inherently location-based and require verified GIS layers to ensure compliance with both state and federal requirements.

Additionally, New Hampshire's governance structure—comprised of 234 municipalities and limited county-level administration—makes centralized GIS coordination particularly critical with municipalities, regional planning commissions, and state agencies dependent on consistent statewide data standards and interoperable systems to ensure informed decision-making and efficient use of public resources.

ESRI is the sole developer and distributor of the ArcGIS suite, including ArcGIS Pro, ArcGIS Online, and related proprietary tools. These products are not available through third-party vendors or alternative distributors. All licensing, updates, technical support, and maintenance must be obtained directly from ESRI to ensure system integrity and compatibility.

Core GIS datasets—including municipal boundaries, infrastructure assets, environmental constraints, demographic indicators, and broadband availability data—require continuous updates, quality control, and periodic field verification. As federal funding programs increasingly

require detailed mapping, validation, and performance reporting, the operational demand for reliable GIS support has grown substantially. Maintaining these datasets is an ongoing responsibility, not a one-time effort.

Failure to maintain accurate and current GIS data presents significant operational and fiscal risks, including:

- Reduced ability to meet statutory reporting obligations
- Diminished competitiveness for federal funding opportunities
- Inaccurate infrastructure planning and capital investment decisions
- Increased duplication of effort across agencies
- Reduced transparency and data accessibility for municipalities and stakeholders

Historically ESRI software has served as the foundational GIS platform for New Hampshire state agencies since the 1980s and remains integral to the State's GIS infrastructure. Through coordination with the Office of Planning and Development, the NH GIS Advisory Committee, and the GRANIT geodata portal partnership with the University of New Hampshire's Complex Systems Research Center, agencies statewide rely on ESRI tools and a broad ecosystem of custom applications developed around this platform.

Transitioning to an alternative GIS vendor would require substantial redevelopment of existing applications and systems, resulting in significant costs, operational disruption, and potential delays in federally funded projects. Given ESRI's exclusive ownership of its software and the State's longstanding reliance on this platform, amending the existing contract is necessary to ensure continuity of operations, avoid unnecessary transition expenses, and maintain system compatibility.

The contractor has demonstrated satisfactory performance throughout the contract term, delivering services in a timely and professional manner. Approval of this amendment will ensure continued stability, allow ongoing projects to proceed without disruption, and provide sufficient time to complete work already underway while preserving compliance with state and federal requirements.

RE: Request Amendment to Increase Price Limitation

Dear Commissioner Arlinghaus:

The Department of Environmental Services (NHDES) supports the amendment to increase the contract price limitation for the State's Geographic Information Systems (GIS) foundational software, Esri.

Geographic Information Systems (GIS) involves the acquisition, analysis, and display of data that have geographic location as an attribute. These geospatial datasets are often displayed in maps which provide a powerful visual representation for critical decision-making. GIS at NHDES relies heavily on software from the Environmental Systems Research Institute (Esri), an international supplier of GIS software.

Esri builds the leading mapping and spatial data software products under the product name ArcGIS. ArcGIS Enterprise is the Esri foundational software for running an out-of-the-box suite of GIS mapping applications, as well as user-built custom applications. ArcGIS Enterprise provides a powerful platform for running data visualization, analytics, and management. ArcGIS Enterprise is also tightly integrated with the Esri desktop applications (ArcGIS Desktop and ArcGIS Pro) for mapping and publishing data, and seamlessly connects with ArcGIS Online, a cloud platform designed to share content with public stakeholders through web browsers on any device – desktop, tablet, or mobile.

NHDES uses this suite of Esri products to capture, view, edit, manage, analyze, and share data in the context of location. The ability to show spatial patterns in NHDES environmental data facilitates collaboration and presentation. Esri's comprehensive and scalable digital mapping and analytics software enables NHDES' internal and external stakeholders to collect, process, and present large, complex, and seemingly disconnected volumes of data which informs decision-making and improves environmental outcomes for the State of New Hampshire.

Environmental data is compiled into permitting, compliance, investigation, and environmental monitoring, testing, and sampling with presentation on NHDES's public facing OneStop web map for displaying and querying over 240,000 environmental sites. Esri software is used to create and publish more than three thousand online items including map and feature services which provide access to NHDES environmental data and related information through the OneStop web map and other viewers. The stakeholders include GIS data owners and data consumers at NHDES, as well as multiple external stakeholders including:

- Citizens
- Non-profit agencies
- Regional planning commissions
- Consulting firms
- Federal Agencies
- Municipalities
- Utilities
- Land Trust Organizations
- Educators
- Universities and
- Scientists

The Esri platform and its tools allow NHDES' internal users to produce content critical to the operations and economic viability of hundreds of businesses such as:

- Professional engineering
- Solid waste haulers & disposal site operators
- Public and private water systems
- Gas station operators, owners, & developers
- Hazardous waste haulers and waste disposal
- Property insurance underwriters
- Professional environmental services
- Water well contractors
- Septic system owners, designers & installers
- Emergency planning & management
- Earth moving and excavation
- Electric, telecommunication, & energy utilities
- Real estate sales and development
- Marine contractors & dock builders
- Industrial and residential financing and development
- Banks and lending institutions
- Tourism and recreation
- Farming, agriculture, and forestry conservation and land protection

OneStop's customer base has evolved and increased due to the usability and accessibility of computers and mobile devices. The worldwide available technology has exponentially increased customer expectations and business needs. Esri is the only GIS software company that can provide the functionality and capability across cloud, mobile and desktop systems to meet NHDES stakeholder expectations and business requirements.

Specifically, Esri software has been integral to the development of NHDES' practices for integration of our enterprise GIS with other critical business systems. NHDES' ArcGIS Enterprise software has been configured to connect with the State's Single Sign On credentialing system allowing agency-wide access to the data, applications, and tools necessary for meeting programmatic goals and strategic agency initiatives. NHDES uses Esri's ArcGIS Server which makes environmental geographic information widely available to the public for increased transparency and accessibility. NHDES' ArcGIS Online and ArcGIS Enterprise connect with approximately eighty public applications related to NHDES' business workflows which are essential for regulatory, rules, and legislative directives. Esri products synchronize with existing internal Agency Oracle database applications, all of which would need to be reconfigured at a great cost if the State were to choose another vendor.

Using a non-Esri solution would also change the way that NHDES presents information to, and receives information from, both internal and external users to satisfy citizen service, regulatory, and statutory requirements, and standards. The existing Esri structured configuration and data handling procedure aligns with industry and security best practices and provides NHDES the ability to support sustainable citizen service and meet regulatory and statutory requirements. In addition, there is no single vendor or product that could provide the comprehensive solutions that are available through Esri in an effective and efficient manner.

It would be extremely expensive in staff time and state funding to migrate from Esri products at NHDES. Replacing this technology will have a negative return on investment and would require a significant re-investment in technological resources, training, development, hardware, and software. It would also require an excessive amount of time to dismantle, decommission, and then rebuild new data connections spiderwebbing throughout the Agency's more than forty databases, servers, and data warehouses.

In addition, NHDES relies heavily on the University of New Hampshire's Earth Systems Research Center (NH GRANIT) as the repository for hosting large datasets of NHDES data and maps, all using Esri technologies at their base. Any change in this technology will cascade, affecting NH GRANIT's ability to serve the public need through NHDES, as well as affect partners including other state agencies who also use Esri technology as their foundational GIS platform. Esri is a leader in GIS technology utilized in post-secondary education systems around the world, including those locally of Dartmouth College, Harvard University, Keene State, and the University of New Hampshire, with colleges offering both undergraduate and graduate classes and post-doctoral research opportunities with Esri's geospatial technology. Many of NHDES' employees come "ready fit" from these institutions with extensive Esri training, adding incredible value to NHDES data workflows and map visual presentation for the benefit

of stakeholders including businesses, non-profits, municipalities, and consultants, many of whom also use Esri technology for business needs in the State.

**RE: Request for Contract Increase with Sole Source
Vendor (Esri)**

To Whom it May Concern,

The Department of Transportation (NHDOT) continues to support the Sole Source use of Esri software as the state's Geographic Information Systems (GIS) foundational software. NHDOT's GIS has invested in and standardized on the Esri (Environmental Systems Research Institute) software suite for over 25 years. The Department also supports the current request for an increase in contract funds. The Department continues to rely on the Esri platform for its GIS use in the Department, and our involvement with GIS and Asset Inventory/Management continues to grow, which leads to the demand in new and additional software licenses and services with Esri.

Esri builds the leading and comprehensive mapping and spatial data software suite. The Esri suite of GIS tools and applications is used throughout many States Department of Transportations and Federal Highway Administration to manage transportation systems for travel, movement of freight, and safety.

NHDOT uses GIS for the acquisition, analysis, and display of numerous geospatial datasets. These datasets and derived analyses of these datasets allow NHDOT staff to create graphical displays and reports for Department staff, leadership, Legislators, Executive Councilors and other leaders. This information supports critical decision-making from work force management to executive leadership and to meet federal and state reporting requirements. NHDOT leverages the out-of-the-box GIS mapping applications and user built custom applications tools to meet the Department objectives and goals. These tools include ArcGIS Enterprise, ArcMap, ArcPro, Model Builder, Road & Highways, ArcGIS Online (AGO), Field Maps, Network Analyst, and Experience Builder.

NHDOT's GIS uses Esri software to provide the core transportation networks and transportation inventories and for highways, bridges, railroads, and airports for the Department, other state agencies, regional planning commissions, and municipalities. These core networks provide the foundation for many of the essential state and federal programs administered by the Department including:

- Road Inventory/HPMS (Highway Performance Monitoring System – FHWA required information)
- Roadside Inventory (Guardrail, Culverts, Overhead Sign Structures, Pedestrian infrastructure)
- Pavements
- Bridges
- Airports
- Railroads
- Traffic Management
- Freight Planning
- Safety Analysis
- Environmental Permitting & Resiliency
- Oversize/Overweight Permitting
- Snowplow Optimization
- Work Order and Fleet Inventory (WOFI)
- TSMO (Transportation Systems Management & Operations)

In addition to providing standalone functionality, the Esri GIS data and systems are integrated into the Department's financial data warehouse and with other data and systems to support the essential programs and reporting needs of the Department.

The Department utilizes the Esri technical support and training resources to develop, grow, and maintain the GIS environment (Hardware and Software) to maintain current best practices. The Department continues to train and support hundreds of Department GIS users of the various Esri GIS tools and applications. The time and cost to develop, learn, train users, and integrate data systems in a Comparable GIS environment using a single or multitude of GIS vendors is not practical with available resources.

Not to be understated, because all State of NH has utilized Esri GIS, additional benefits include the seamless integration with other state agencies using Esri GIS and with the NH Statewide GIS Clearing house housed by GRANIT @ UNH, which utilizes Esri GIS software.

Esri GIS is also the primary GIS tool used in secondary and higher education which provides future GIS resources to the Department. The combination of these exceptional products and services, with their proven track record for reliability and innovation, is why the Department has adapted to the higher standard over the past few decades of Esri's GIS platform over other companies in the field of GIS.

Dear Commissioner Arlinghaus,

The Department of Natural and Cultural Resources (DNCR) has contracted with the Environmental Systems Research Institute, Inc (ESRI) for several projects within the department. One of which is with the Bureau of Trails, who received ARPA funds to contract with ESRI to develop their existing GIS database into an expansive tool to manage & maintain the extensive trail system within New Hampshire.

The expansion of this tool is already benefitting the management of the state trail system by providing interactive data with other divisions and agencies with live changes to data being seen in real time. Our trails staff are also using this tool to plan maintenance projects by creating easy to interpret maps to support grant applications. Recently, our bureau used this tool to map the trails within the parcel on the National Guard Property in Concord. Plans for this property will be developed in partnership with the National Guard using ESRI to support those efforts and planning.

DNCR plans to use ESRI to connect and share with additional partner agencies, such as Fish & Game, to directly provide them with accurate trail location information to assist with search and rescue efforts. A long-term goal of our bureau is to develop a public-facing version for the public to utilize.

Our agency could be negatively impacted if the allowed state contract price limitation is not increased because our Bureau is still expending funds that were encumbered for this project, such as utilizing the training credits for staff.

If you have any questions or need additional information, feel free to contact the Bureau of Trails. Craig Rennie is the Chief of the Bureau of Trails and can be reached at (603) 271-3990.

Subject: Unique Positioning Letter

Dear Ms. Tatro:

In support of Esri's proposal to work with the State of New Hampshire, in providing both software and professional services for the state, Esri is providing this letter which confirms that Esri is uniquely positioned to provide the State of New Hampshire with advanced Geographic Information System (GIS) knowledge and experience required to improve the operations of the State. Since 1969, we have supported customers all around the globe with geographic science and geospatial analytics, what we call "The Science of Where." Esri has more than 5,000 employees from 73 countries. 49 office locations worldwide, including 11 research and development centers. Lastly, over 350,000 organizations, including 90% of Fortune 100 companies, most national governments, 30,000 cities and local governments, all 50 US states, and 12,000 universities are customers of Esri.

Esri is uniquely qualified to provide the proposed services to State of New Hampshire for the following reasons:

- As the owner and developer of the ArcGIS family of products, Esri is the industry leader in Geographic Information Systems (GIS) providing these Commercial Off-the-Shelf (COTS) products.
- Esri is the only source from which all Esri® software and maintenance services (technical support plus Esri software updates/upgrades) can be ordered, and Esri is the sole source of certain proprietary Training courses, Advantage Program, and other such consulting packages.
- The Esri team has extensive experience developing and implementing GIS solutions at an enterprise level all over the world, and more specifically, with U.S. federal clients, U.S. states, U.S. cities, counties, conservation agencies, and non-profit organizations.
- Esri's technical experience includes working with many counties, cities and municipalities within the State of New Hampshire identifying and collecting data, mapping of features, creating automation, and performing analysis of business operations and problems that face these diverse users. These factors coupled with our ability to reach back to our core software development team allow Esri to provide the State with technical resources that are not available from other contractors or resellers.
- Esri Professional Services team is part of Esri's core business group supporting and developing the next iteration of advances to the ArcGIS family of GIS software products. Our affiliation with Esri's core business team uniquely positions our Professional Services' team with valuable insight when migrating our clients to the next version of our GIS technology.

The State of New Hampshire is a valued, long-time customer of Esri, and we remain committed to partnering with you on your important work. State level departments including Transportation, Environment, Public Safety, and Fish and Game depend on Esri software for critical needs. Our goal is to help you fully leverage your investment in ArcGIS and apply its capabilities toward your desired solution.

We look forward to working with you and your staff on this endeavor. If I can be of further assistance, please do not hesitate to contact me.

**FIRST AMENDMENT TO THE CONTRACT BETWEEN
ENVIRONMENTAL SYSTEMS RESEARCH INSTITUTE, INC.
AND
THE STATE OF NEW HAMPSHIRE,
DEPARTMENT OF ADMINISTRATIVE SERVICES,
FOR GEOGRAPHIC INFORMATION SYSTEMS SOFTWARE AND TRAINING SERVICES
CONTRACT # 8003310**

This First Amendment (hereinafter referred to as the “Amendment”) is by and between the State of New Hampshire, Department of Administrative Services (hereinafter referred to as “the State”) and Environmental Systems Research Institute, Inc. hereinafter referred to as “the Contractor”) for Geographic Information Systems Software and Training Services.

WHEREAS, pursuant to an agreement effective May 29, 2024 and set to expire October 31, 2028, (hereinafter referred to as “the Agreement”), the Contractor agreed to perform certain geographic information systems software and training services for the State in consideration of payment by the State of certain sums as specified therein; and

WHEREAS, pursuant to Section 18 of the Agreement, the Agreement may be amended by an instrument in writing executed by both parties;

TIME AND MATERIALS RATE SCHEDULE

Effective January 1, 2026

Hourly time and materials labor category descriptions and rates have been provided for each labor category for calendar year 2026 through 2028. The hourly labor rates for services that are performed after each calendar year may be escalated in an amount not to exceed five percent (5%) each year. Other direct costs, such as travel, reproduction, subcontractor, telecommunication/freight, or materials, will be charged a material handling fee and invoiced.

Esri reserves the right to provide fixed price quotations for professional services requests that require deliverables other than hours. Work performed under fixed price orders will require additional terms and conditions and will be invoiced monthly based on percentage completed.

Technology Consultant/Engineer (S1)

Staff members in this labor category provide day-to-day technology consulting, troubleshooting, and engineering services on many aspects of project implementation. These projects include COTS software configuration, custom software development, database consulting, training development and delivery, technical documentation, and other technology consulting and engineering services. Individuals in this category have specialized skills and experience with a variety of technologies that can be applied to a broad spectrum of assignments.

Senior Technology Consultant/Engineer (S2)

Staff members in this labor category provide strategic technology consulting and engineering services across project implementation. These staff may provide technical leadership services, architecture and design services, as well as training development and delivery for small to moderately complex solutions. Individuals in this category have higher-level specialized skills and experience with a variety of technologies that can be applied to a broad spectrum of assignments.

Principal Technology Consultant/Engineer (S3)

Staff members in this labor category work as technical leads and/or senior technical advisers, providing technology vision, solution architecture, and strategic technology consulting for projects of all sizes and scopes. These staff may provide strategic technology design & planning, oversight of technical implementation activities, solution architecture and database design, system integration, and other technology training, consulting, and engineering services. Individuals in this category have advanced, diverse, and specialized skills and experience with a variety of technologies that can be applied to a broad spectrum of complex assignments. Staff

members in this labor category work with senior client staff in coordination with Esri senior management to resolve issues and support a successful project completion.

Consultant/Project Manager (M1)

Staff members in this labor category provide day-to-day consulting for and management of many aspects of GIS and related technology projects. The scope of these projects may include database development and administration, training, technical support, business process design and development, definition of work plans, project management of technical and contractual deliverables, and ad hoc consulting. For complex projects, these individuals may team with senior staff to develop comprehensive work plans that address risk, schedule, and budget management and provide the framework for project implementation.

Senior Consultant/Project Manager (M2)

Staff members in this labor category provide strategic consulting and management services for complex GIS and related technology projects. These staff members have market/application domain expertise with extensive experience in various technologies required to support the successful completion of a project. Consulting activities may include strategic planning, implementation of change management methodologies and system integration, and training, as well as project management oversight of project deliverables and subcontractors. These individuals may also design comprehensive work plans that address risk, schedule, and budget management and provide the framework for project implementation.

Principal Consultant/Program Manager (M3)

Staff members in this labor category work as program directors or project advisers, providing project vision, strategic consulting, and program management activities for GIS and related technology projects. Consulting activities may include strategic planning, oversight of requirements definitions, application and database design, system integration, curriculum development and help desk system architecture. Management activities may include providing oversight on defining program requirements and objectives, establishing budgets and schedules, as well as allocating staff and other resourcing activities.

Technology Support Specialist (DB)

Staff members in this labor category work in professional entry-level roles to support definable activities of larger technology projects. Working with technical and management leads and mentors, these staff provide support to technology projects as assigned.
