13. In accordance with Env-Wt 511.05(b), revegetation of the disturbed area by planting trees, shrubs, and ground covers shall represent the density and species diversity of the existing stand of vegetation removed for the project; and begin at a distance no greater than 5 feet landward from the water access structure's footprint.
14. Pursuant to RSA 482-A:14, RSA 482-A:14-b, and RSA 482-A:14-c, NHDES is authorized to take appropriate compliance actions should it be determined that, based upon additional information which becomes available, any of the structures depicted as "existing" on the plans submitted by or on behalf of the permittee were not previously permitted or grandfathered.

EXPLANATION

NHDES approved this project on June 08, 2026. NHDES supported its decision with the following findings:

1. This is a major impact project per Administrative Rule Env-Wt 513.24(c), the proposed docks will provide five slips on the frontage.
2. The applicant has an average of 393 feet of frontage along Lake Winnepesaukee.
3. A maximum of 6 slips may be permitted on this frontage per Rule Env-Wt 513.12, Frontage Requirements for Private and Non-commercial Docking Structures.
4. The proposed docking facility will provide 5 slips as defined per RSA 482-A:2, VIII, and therefore meets Rule Env-Wt 513.12.
5. The NHDES finds that because the project is not of significant public interest and will not significantly impair the resources of Lake Winnepesaukee a public hearing under RSA 482-A:8 is not required.
6. No concerns were received from abutters nor the local Conservation Commission related to the project.
7. The NHDES finds that the project as proposed and conditioned meets the requirements of RSA 482-A and the Wetlands Program Code of Administrative Rules Chapters Env-Wt 100 - 900. No waivers of RSA 482-A or the Wetlands Program Code of Administrative Rules Chapters Env-Wt 100 - 900 were requested or approved under this permit action.

SECTION 7 - RESOURCE-SPECIFIC CRITERIA ESTABLISHED IN Env-Wt 400, Env-Wt 500, Env-Wt 600, Env-Wt 700, OR Env-Wt 900 HAVE BEEN MET (Env-Wt 313.01(a)(3))

Describe how the resource-specific criteria have been met for each chapter listed above (please attach information about stream crossings, coastal resources, prime wetlands, or non-tidal wetlands and surface waters):

The proposed perched beach will not contribute sand or sediment to adjacent surface waters, it will not impact a wetland or PRA and will comply with RSA 483-B and Env-Wq 1400 [Env-Wt 511.02(b) & 511.04(j)]. The beach will be built a minimum of 12" landward of the reference line [Env-Wt 511.04(c)]. The beach surface will have zero slope [Env-Wt 511.04(d)]. The steps to access the lake from the beach will be 4' wide and will be constructed landward of the reference line [Env-Wt 511.04(f)]. It will avoid & minimize the removal of vegetation [Env-Wt 511.04(h)], it meets the Shoreland frontage requirements [Env-Wt 511.04(i)] and won't use more than 20% of the shoreline [Env-Wt 511.04(k)].

The proposed seasonal docks won't affect abutting properties or public's right to navigation [Env-Wt 513.03(a)(1)]. They have been designed to avoid environmental impacts [Env-Wt 513.03(a)(2) & 513.03(a)(3)] and allow safe docking [Env-Wt 513.03(a)(4)]. The docking structures will meet the requirements of Env-Wt 513.09 & Env-Wt 513.10(d). The dock locations will be further than 20' from the abutting property lines [Env-Wt 513.10(a)]. The docks will be perpendicular to the shoreline and any boat secured to the docks will not extend beyond the extension of the abutter's property line [Env-Wt 513.10(d) & Env-Wt 513.10e]. The docking structures meet the dimensional requirements of Env-Wt 513.11 (a)(1). The concrete pads to anchor the seasonal docks will not be more than 7' wide, will not be in a prime wetlands or 100' buffer, will not impact more than 10 lf each along the bank, and will be constructed landward of the normal high water line (Env-Wt 513.13). The proposed accessory docking structures meet the criteria of Env-Wt 513.05(a). The seasonal canopy won't interfere with boating or sight distance and will be installed after ice-out and removed prior to ice in (Env-Wt 513.19).

SECTION 8 - AVOIDANCE AND MINIMIZATION

Impacts within wetland jurisdiction must be avoided to the maximum extent practicable (Env-Wt 313.03(a)).* Any project with unavoidable jurisdictional impacts must then be minimized as described in the [Wetlands Best Management Practice Techniques For Avoidance and Minimization](#) and the [Wetlands Permitting: Avoidance, Minimization and Mitigation fact sheet](#). For minor or major projects, a functional assessment of all wetlands on the project site is required (Env-Wt 311.03(b)(10)). *

Please refer to the application checklist to ensure you have attached all documents related to avoidance and minimization, as well as functional assessment (where applicable). Use the [Avoidance and Minimization Checklist](#), the [Avoidance and Minimization Narrative](#), or your own avoidance and minimization narrative.

*See Env-Wt 311.03(b)(6) and Env-Wt 311.03(b)(10) for shoreline structure exemptions.

SECTION 9 - MITIGATION REQUIREMENT (Env-Wt 311.02)

If unavoidable jurisdictional impacts require mitigation, a mitigation [pre-application meeting](#) must occur at least 30 days but not more than 90 days prior to submitting this Standard Dredge and Fill Permit Application.

Mitigation pre-application meeting date (mm-dd-yyyy):

☒ N/A - Mitigation is not required.

SECTION 10 - THE PROJECT MEETS COMPENSATORY MITIGATION REQUIREMENTS (ENV-WT 313.01(A)(1)(C))

Confirm that you have submitted a compensatory mitigation proposal that meets the requirements of Env-Wt 800 for all permanent unavoidable impacts that will remain after avoidance and minimization techniques have been exercised to the maximum extent practicable

SECTION 11 - IMPACT AREA (Env-Wt 311.04(g))

For each jurisdictional area that will be or has been impacted, provide square feet (SF) and, if applicable, linear feet (LF) of impact, and note whether the impact is After-The-Fact (ATF; meaning work was started or completed without a permit).

For intermittent and ephemeral streams, LF of impact are measured along the thread of the channel. Please note, installation of a stream crossing in an ephemeral stream may be undertaken without a permit per rule Env-Wt 309.02(d); however, other dredge or fill impacts should be included below.

For perennial streams/ivers, LF of impact are calculated by summing the lengths of disturbances to the channel and banks.

Permanent (PERM) impacts are impacts that will remain after the project is complete (e.g., changes in grade or surface materials). Temporary (TEMP) impacts are impacts not intended to remain (and will be restored to pre-construction conditions) after the project is completed.

Project Description: Remove existing house and detached garage, new house and attached garage, reconfigure driveway, add pavillion, permeable patios, walkways, install outdoor kitchen, associated landscaping. Install 2 docks and perched beach to being Spring 2026.

Dear Cindy Buck:

The provided mapped project area has been checked against available records of protected species occurrences and Exemplary Natural Community (ENC) locations. Based on the information submitted, there are currently no recorded occurrences (known records) of protected species or ENCs expected to be impacted by the proposed project.

DataCheck Tool results only reflect documented and verified occurrences of protected species and ENCs. A negative result does not guarantee that protected species and ENCs are not present at this location, only that their presence has not been documented and verified. As many areas have never been surveyed, or have only been surveyed for certain species, surveys are the best way to determine what species are present on site. Based on the information submitted, no further consultation with the New Hampshire Fish and Game Department pursuant to Fis 1004 is required.

Federal compliance: This letter does not constitute compliance with the federal Endangered Species Act (ESA) for the purposes of meeting federal permitting requirements. There may be occurrences of federally listed species in New Hampshire that are not included in this letter. For ESA compliance, please visit the US Fish and Wildlife Service (USFWS) [Information for Planning and Consultation \(iPaC\) website](#) for an official list of federally listed species that may be present in your project area. If a federal agency is involved in your project through funding, permit or other authorization, coordinate your iPaC results with your point of contact at the agency for further ESA review. If there is no federal agency nexus to your project, and you determine through iPaC, habitat evaluations etc. that a project may cause take of a federally listed species, we recommend coordinating with the USFWS New England Field Office (newengland@fws.gov or 603-223-2541).
